

MARMI E GRANITI D'ITALIA
Sicilmarmi dal 1948

Project name:

One MiMa Tower

One MiMA Tower is a 63-story glass building featuring luxury rentals and condominium residences in the middle of Manhattan (hence the name); the apartments, which occupy the 12 top floors of the tower, are among the most luxurious in New York City, offering an unprecedented level of exclusivity and services to their tenants. The project consisted in supplying approximately 3000 square meters of honed Caldia marble (in 30 cm x 60 cm x 1 cm tiles) for the interior covering of the bathrooms' floor and walls, plus the fabrication of 141 vanity countertops (cut from 2 cm slabs) out of the same Caldia marble.
